

HandiEye Pro

The Best Hands-Free Alternative to a Computer Mouse

Comprised of a miniature state-of-the-art camera powered by intelligent software that precisely recognizes head movements, HandiEye is an Ergonomic Solution that allows the user to smoothly and accurately move the cursor across the computer screen by simply moving his or her head

**Requires No Head Gear
Or Reflective Dots**

**Operates In Any
Lighting Conditions**

Easy To Use

Low Cost

HandiEye Pro Boasts The Following Advanced Features

<p>Auto-Click (Dwell)</p>	<p>The Dwell feature allows HandiEye users to easily perform drag & drop operations as well as left-, right- and double-clicks by briefly pausing the cursor movement.</p>	
<p>Gesture Recognition</p>	<p>HandiEye's sophisticated algorithm recognize four head gestures: left, right, up and down nods. Each gesture can be assigned a specific action such as a double click, page-down, etc.</p>	
<p>Hands-Free Auto-Scroll</p>	<p>HandiEye makes it easy to scroll up and down a web page or a document by automatically displaying special controls next to a window when that window is brought into focus.</p>	
<p>Zoom</p>	<p>HandiEye can magnify a portion of the screen around the cursor for precise selection</p>
