

## iPad and Android Accessibility

Over the past few years, tablet computers have become a popular alternative to laptop computers. They assist in education, communication (AAC), entertainment and more. They have become an integrated part of our daily lives. This course will address setting up iPad and Android tablets to be more accessible for those with disabilities.

### This course will cover:

- Adaptive features for low vision users
- Adaptive features for individuals whose muscular control is not sufficient to consistently hit the targets on the screen
- Using VoiceOver
- Typing shortcuts
- The value and appropriateness of security features for different users
- Parental or instructor control features
- Useful apps for custom areas of interest

### You will receive:

- Comprehensive handout and/or electronic document of the course content
- Compact cheat sheet of Windows keystrokes
- Where appropriate, a summary of other information covered based on custom needs

### Course Detail

We offer a session on these topics customized to your particular needs. We can host this session at our location on Dresden Row in Halifax or at your organization's location.

### Course Requirements:

- Access to Internet at the course location
- Workspace that is relatively free of distraction for the training period
- One week prior notice of custom content in order to prepare and organize content appropriately
- One week prior notice of a group session in order to gather information from participants
